# **JURISPRUDENCE AND LEGAL THEORY**

**Course Objective:** The course aims at developing an analytical approach to understand the nature of law, development of law and working of a legal system in different dimensions with reference to popular legal theorists.

#### Course Outcome:

- Any academic discipline, worthy of the name, must develop in the student the capacity for critical thought. Legal education needs to teach both law and its context-social, political and theoretical. At the heart of legal enterprise is the concept of law.
- Without deep understanding of this concept neither legal practice nor legal education can be a purposive activity. This course in jurisprudence is designed, primarily to induct students into a realm of questions concerning nature of law.
- Therefore, the first part of the course is concerned with important questions like what is law, what are the purposes of law, the relationship between law and justice and the like. The second part is concerned with the important sources of law.
- The emphasis is on important issues concerning law with reference to ancient and modern Indian legal thought. One important branch of jurisprudence consists in analysis of legal concepts. The law of contract and tort is concerned with different rights, which one person may have against another.
- Jurisprudence, on the other hand, studies the meaning of the term "rights" in the abstract and seeks to distinguish various kinds of rights which are in theory possible under a legal system. Similarly, it investigates other legal concepts and tries to build up a general and more comprehensive picture of each concept as a whole.
- This course is designed primarily on English model but native India orientation is given wherever possible.

# **Professional Ethics and Professional Accounting System**

(Practical)

**Course Objective-** Professional Ethics, Accountancy for Lawyers and Bar-Bench Relations This Course will be taught in association with practicing lawyers on the basis of following materials.

# **Course Outcome:**

- Professions are noble. The movement of all professions, hitherto, has been from chaos to organisation, organisation to consolidation and consolidation to autonomy and monopoly. Same is true of the law profession also. The prime reason for conferring autonomy and monopoly by the society on the professionals is the fact that they are a body of learned persons and the interest of society and individuals is safe in their hands.
- The Bar should set enviable standards of ethics and scrupulously adhere to them as also enforce them. It is too good of the society to trust the learned body of the professionals to regulate themselves and not to empower an outsider to sit in judgement over their activities.
- The trust reposed by the society in profession is to be zealously guarded. The Bar should live up to the expectations of the society. The society has a right to expect of the professionals such ideal behavior.
- The course is designed to imbue students with these high values forming the basis of the profession so that they can live up to those standards in their professional life.

# Interpretation of Statutes and Principles of legislation

**Course Objective**: The paper is to equip the students with various tools of interpretation of statutes.

### Course Outcome:

- As it is difficult to have legislation without ambiguous provisions, there is a need to make proper study of the rules and principles relating to interpretation of statutes. Legislation is the major source of law of modern era. Legislatures enact laws after much deliberation. No doubt in this process they have to take into account the present and future needs of the people.
- What are the matters to be reckoned with by legislature while enacting laws? With the emergence of legislation, interpretation of statutes became a method by which judiciary explores the intention behind the statutes. Judicial interpretation involves construction of words, phrases and expressions.
- In their attempt to make the old and existing statutes contextually relevant, Courts used to develop certain rules, doctrines and principles of interpretation. Judiciary plays a highly creative role in this respect.
- What are techniques adopted by courts in construing statutes? How far are they successful in their strategy? With the above problems and perspectives in view, this paper is framed.
